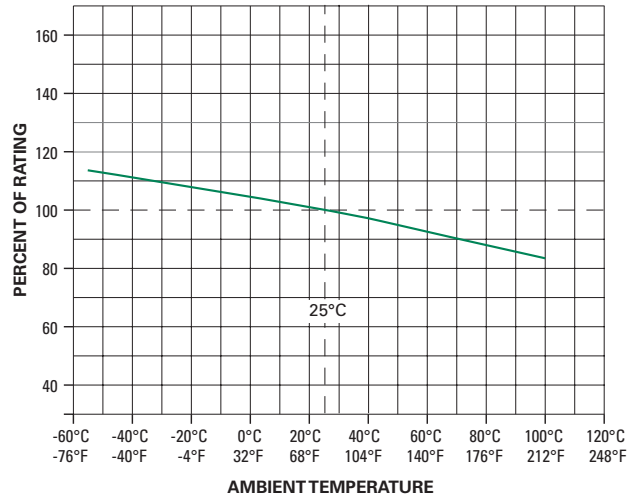
Temperature Re-rating Curve



Note:

1. Rerating depicted in this curve is in addition to the standard derating of 25% for continuous operation.
   Example:
   For continuous operation at 70°C, the fuse should be re-rated as follows:
   $I = (0.75)(0.90)I_{RAT} = (0.675)I_{RAT}$
2. The temperature re-rating curve represents nominal conditions. For questions about the temperature re-rating curve, please consult Littelfuse technical support assistance.
